

IMPORTANT RESOURCES – PL-200 CERTIFICATION PREPARATION

Although you have learned from the PL-200 Practice Tests, it is important to go through these resources to prepare for the exam and learn everything required to work with Power Platform.

Microsoft exam pattern is focused on practical experience. If you practice well, understand the concepts, you can pass easily!

By using the practice tests, consider yourself 90% prepared. The remaining 10% is by learning from the resources and practicing on the Power Platform applications.

Important: Don't forget to take Microsoft Exam Replay. It is highly recommended as Microsoft is making changes rapidly, you may expect questions from outside the exam curriculum, and you can't afford to pay them again (only if the first attempt is not successful). [Learn more here \(choose your country to see the pricing\).](#)

The screenshot shows the Mindhub website interface. At the top, there is a search bar and a navigation menu with categories like IT CERTIFICATIONS, PROFESSIONAL CERTIFICATIONS, and REGULATORY. The main content area displays the product "Microsoft Exam Replay: MCP exam + Retake". The product image shows a laptop with a Microsoft logo and a certification badge. To the right of the image, the price is listed as \$230.00, with a list price of \$550.00 and a 30% discount. There are also customer reviews and a "Write a Review" link. At the bottom, there are tabs for "DESCRIPTION" and "CUSTOMER REVIEWS".

***Please read the offer details and terms & conditions.**

I wish you all the best.

To Your Success,
Abhay Sharma
