

## PL-200 Practice Test Set 5 – Integrate Power Apps With Other Apps And Services (15-20%): Explanation

### Question 1:

You are a Power Platform functional consultant. You need to identify AI builder models best suited for the requirements.

**Requirement:** Which one of the following models analyzes historical data patterns?

- A. Object Detection
- B. Text Recognition
- C. Prediction
- D. Sentiment Analysis
- E. Entity Extraction
- F. Form Processing

### Answer Area

C. Prediction

### Explanation

AI Builder prediction models analyze patterns in historical data that you provide. Prediction models learn to associate those patterns with outcomes. Then, we use the power of AI to detect learned patterns in new data and use them to predict future outcomes.

Use the prediction model to explore business questions that can be answered in one of the following ways:

- From two available options (binary)
- From multiple possible outcomes
- Where the answer is a number.

[Learn more here.](#)

### Question 2:

You are a Power Platform functional consultant. You need to identify AI builder models best suited for the requirements.

**Requirement:** Which one of the following models identifies objects from the images captured by a camera?

- A. Object Detection
- B. Text Recognition
- C. Entity Extraction
- D. Form Processing

### Answer Area

A. Object Detection

### Explanation

Object detection can help expedite or automate business processes. It can help streamline inventory management in retail, allowing retail leaders to focus on onsite customer relationships.

In manufacturing, technicians can speed the repair process by quickly accessing the manual for a piece of machinery for which the UPC/serial number isn't obvious.

[Learn more here.](#)

### Question 3:

You are a Power Platform functional consultant. You need to identify AI builder models best suited for the requirements.

**Requirement:** Which one of the following models can read both printed and handwritten text in an image?

- A. Object Detection
- B. Text Recognition
- C. Entity Extraction
- D. Form Processing

### Answer Area

B. Text Recognition

### Explanation

Text recognition can read both printed and handwritten text in an image.

[Learn more here.](#)

### Question 4:

You are a Power Platform functional consultant. You need to identify AI builder models best suited for the requirements.

**Requirement:** Which one of the following models read and extracts information from documents such as invoices and purchase orders?

- A. Object Detection
- B. Text Recognition
- C. Entity Extraction
- D. Form Processing

### Answer Area

D. Form Processing

### Explanation

Form processing model can read and extract information from documents such as invoices and purchase orders. [Learn more here.](#)

### Question 5:

You are a Power Platform functional consultant. You need to identify AI builder models best suited for the requirements.

**Requirement:** Which one of the following models can recognize specific data in text data?

- A. Object Detection
- B. Text Recognition
- C. Entity Extraction
- D. Form Processing

### Answer Area

C. Entity Extraction

### Explanation

Entity extraction recognizes specific data in text data. Entity extraction transforms unstructured text into structured data that can be used in apps and flows. [Learn more here.](#)

### Question 6:

You are a Power Platform functional consultant. You create a model, and you are using it in your apps and flows. Now, you want other team members to use the model in their apps and flows.

What should you do?

- A. Publish the model
- B. Train the model
- C. Edit the model
- D. Share the model

### Answer Area

D. Share the model

### Explanation

To make your model available to other makers, you must share your model. [Learn more here.](#)

### Question 7:

You are a Power Platform functional consultant. You are educating a group of new consultants on word templates.

**Requirement:** You need to create a Word template that is only accessible by a subset of users. The users have a unique security role and belong to a unique team.

Which two of the following are the solution to the requirement?

- A. Set the privilege for the document template table to read in the security role.
- B. Create an organization template and assign the security role to the template.
- C. Create a personal template and share it with the team.

D. Set all privileges for article templates in the security role.

#### Answer Area

B. Create an organization template and assign the security role to the template.

C. Create a personal template and share it with the team.

#### Explanation

You should create an organizational template and assign the security role to the template.

And a personal Word template can be shared with users or teams.

[Learn more here.](#)

#### Question 8:

You are a Power Platform functional consultant. You are educating a group of new consultants on the Power Platform.

**Requirement:** You need to explain how you can trigger a Power Automate flow from within a Power BI report.

Which one of the following meets the requirement?

- A. A comment is added to a Power BI dashboard.
- B. A Power BI dataset is refreshed.
- C. A Power BI alert threshold is breached.
- D. A Power BI workspace is shared.

#### Answer Area

C. A Power BI alert threshold is breached.

#### Explanation

A power BI alert can trigger a Power Automate flow. [Learn more here.](#)

#### Question 9:

You are a Power Platform functional consultant. You are educating a group of new consultants on the Power Platform.

**Requirement:** You need to explain which Visual is required on the report to trigger a Power Automate flow.

Which one of the following meets the requirement?

- A. Power Apps
- B. Scatter
- C. TreeMap
- D. KPI

#### Answer Area

D. KPI

#### Explanation

A power BI alert can only be added to KPI, gauge, and card visuals. No other Power BI visual can trigger a Power Automate Flow. [Learn more here.](#)

#### Question 10:

You are a Power Platform functional consultant. You are educating a group of new consultants on the Power Platform.

**Requirement:** You need to explain which visual is required on a report that allows users to perform actions.

Which one of the following meets the requirement?

- A. Power Apps
- B. Scatter
- C. TreeMap
- D. KPI

#### Answer Area

A. Power Apps

#### Explanation

A power Apps canvas app can be embedded in a Power BI report using the Power Apps visual. The embedded canvas app can take action from within the report. [Learn more here.](#)

#### Question 11:

You are a Power Platform functional consultant. You are educating a group of new consultants on the Power BI.

**Requirement:** You need to share a Power BI dashboard with the five internal users.

Which one of the following meets the requirement?

- A. Power BI app
- B. Security group
- C. Dataverse security role
- D. Individual email addresses
- E. Power BI role

#### Answer Area

D. Individual email addresses

#### Explanation

You should use individual email addresses to share Power BI dashboards with a small number of internal users. [Learn more here.](#)

**Question 12:**

You are a Power Platform functional consultant. You are educating a group of new consultants on the Power BI.

**Requirement:** You need to share a Power BI dashboard with external users.

Which one of the following meets the requirement?

- A. Power BI app
- B. Security group
- C. Dataverse security role
- D. Individual email addresses
- E. Power BI role
- F. Dynamic distribution list

**Answer Area**

- B. Security group

**Explanation**

External users need to be in a Microsoft 365 security group to access Power BI. [Learn more here.](#)

**Question 13:**

You are a Power Platform functional consultant. You are educating a group of new consultants on the Power BI.

**Requirement:** You need to share a Power BI dashboard with an internal department of 201 users.

Which one of the following meets the requirement?

- A. Power BI app
- B. Dataverse security role
- C. Power BI role
- D. Security group
- E. Dynamic distribution list

**Answer Area**

- D. Security group

**Explanation**

You only share with 100 individual users at a time. You should use a distribution group or security group when the number of users is more than 100. [Learn more here.](#)

**Question 14:**

You are a Power Platform functional consultant. You are educating a group of new consultants on the Power BI.

**Requirement:** You need to share a Power BI dashboard with the entire organization of 1075 users.

Which one of the following meets the requirement?

- A. Power BI app
- B. Dataverse security role
- C. Power BI role
- D. Security group
- E. Dynamic distribution list

**Answer Area**

- A. Power BI app

**Explanation**

You should use a Power BI app to share with the entire organization. By default, an app is published to all users in an organization. [Learn more here.](#)

**Question 15:**

You are a Power Platform functional consultant. You are educating a group of new consultants on the Power BI.

**Requirement:** You need to apply row-level security.

Which one of the following meets the requirement?

- A. Dataverse security role
- B. Power BI role
- C. Security group
- D. Dynamic distribution list

**Answer Area**

- B. Power BI role

**Explanation**

Power BI roles are used with row-level security. [Learn more here.](#)

**Question 16:**

You are a Power Platform functional consultant. You are educating a group of new consultants on the OneNote integration with Dynamics 365 model-driven app.

What are the two requirements to enable OneNote integration?

- A. Enable server-based SharePoint integration.
- B. Enable OneDrive for Business permission in the security roles.
- C. Enable Enhanced Microsoft Teams integration.
- D. Enable document management for the table.
- E. Enable OneDrive for Business (online) in system settings.

**Answer Area**

- A. Enable server-based SharePoint integration.
- D. Enable document management for the table.

#### Explanation

Before you can enable OneNote integration, you need to turn on server-based SharePoint integration.

Make sure you have the System Administrator security role or equivalent permissions in Microsoft Dynamics 365. Or, make sure that you have Read and Write privileges on all customizable record types.

[Learn more here.](#)

#### Question 17:

You are a Power Platform functional consultant. You manage templates in a model-driven app.

You need to add templates to a solution so you can transport them to another environment.

**Statement:** You can include a Word template in a solution.

If the statement is correct, select True. Otherwise, select False.

- A. True
- B. False

#### Answer Area

- B. False

#### Explanation

Word templates are not solution-aware and cannot be added to a solution. [Learn more here.](#)

#### Question 18:

You are a Power Platform functional consultant. You manage templates in a model-driven app.

You need to add templates to a solution so you can transport them to another environment.

**Statement:** You can include an Email template in a solution.

If the statement is correct, select True. Otherwise, select False.

- A. True
- B. False

#### Answer Area

- A. True

#### Explanation

Email templates are solution-aware and can be added to a solution. You should export the templates to a zip file as an unmanaged solution and then import the saved file into another environment.

[Learn more here.](#)

**Question 19:**

You are a Power Platform functional consultant. You manage templates in a model-driven app.

You need to add templates to a solution so you can transport them to another environment.

**Statement:** You can include templates for data import in a solution.

If the statement is correct, select True. Otherwise, select False.

- A. True
- B. False

**Answer Area**

- B. False

**Explanation**

Templates for data import are not solution-aware and cannot be added to a solution. [Learn more here.](#)

**Question 20:**

You are a Power Platform functional consultant. You manage templates in a model-driven app.

You need to add templates to a solution so you can transport them to another environment.

**Statement:** You can include excel templates in a solution.

If the statement is correct, select True. Otherwise, select False.

- A. True
- B. False

**Answer Area**

- B. False

**Explanation**

Excel templates are not solution-aware and cannot be added to a solution. You need to recreate the excel template in another environment manually. [Learn more here.](#)

**Question 21:**

You are a Power Platform functional consultant. You create canvas apps and model-driven apps, and the same needs to be embedded in Microsoft Teams.

**Requirement:** You need to add model-driven apps to channels.

What should you use?

- A. Office 365 Groups connector
- B. OneDrive for Business
- C. Server-based integration
- D. Server-side synchronization
- E. OneNote

**Answer Area**

C. Server-based integration

**Explanation**

You need to enable Server-based integration and configure the integration with SharePoint before fully integrating Model-driven apps with Microsoft Teams. Server-based integration must be enabled and configure before enabling Basic Teams integration. [Learn more here.](#)

**Question 22:**

You are a Power Platform functional consultant. You create canvas apps and model-driven apps, and the same needs to be embedded in Microsoft Teams.

**Requirement:** You need to add Canvas apps for all users to the left-hand rail.

What should you use?

- A. Enable Enhanced Teams integration.
- B. Edit the Teams global app setup policy.
- C. Enable the embedding of model-driven apps.
- D. Share the app with all Teams members.

**Answer Area**

B. Edit the Teams global app setup policy.

**Explanation**

You need to edit the Global App Setup policy and enable the Upload custom apps option in the Teams admin center to add Canvas apps for all users to the left-hand rail in Microsoft Teams. [Learn more here.](#)
