PL-200 Practice Test Set 3 – Create and manage Power Automate (15-20%): Explanation

Question 1:

You are a Power Platform functional consultant.

You are educating a team of new consultants on Power Atomate flows. You need to ensure the flow triggers when an opportunity is created.

Statement: Enable auditing on the opportunity table.

Does this statement meet the goal?

A. True
B. False

B. False

Explanation

This statement does not meet the goal. Auditing will not invoke a flow trigger. Triggers like: When a record is created, When a record is updated, and When a record is deleted, initiate your flow within a few minutes of the event occurring.

Learn more here.

Question 2:

You are a Power Platform functional consultant.

You are educating a team of new consultants on Power Atomate flows. You need to ensure the flow triggers when an opportunity is created.

Statement: Enable change tracking on the opportunity table.

Does this statement meet the goal? Select True if yes, otherwise select False.

A. True
B. False

A. True

Explanation

This statement meets the goal. To invoke a flow trigger, change tracking must be enabled on the table.

Learn more here.

Question 3:

You are a Power Platform functional consultant.

You are educating a team of new consultants on Power Atomate flows. You need to ensure the flow triggers when an opportunity is created.

Statement: Enable business process flows on the opportunity table.

Does this statement meet the goal? Select True if yes, otherwise select False.

A. True
B. False

B. False

This statement does not meet the goal. Business process flows are not linked to the triggering of flows. Learn more here.

Question 4:

You are a Power Platform functional consultant.

You are educating a team of new consultants on Power Atomate flows. You need to ensure the flow triggers when an opportunity is created.

Statement: Enable queues on the opportunity table.

Does this statement meet the goal? Select True if yes, otherwise select False.

A. True
B. False

B. False

This statement does not meet the goal. Queues are not linked to the triggering of flows.

Learn more here.

Question 5:

You are a Power Platform functional consultant.

You are educating a team of new consultants on Power Atomate flows. You need to ensure the flow triggers when an opportunity is created.

Statement: Enable Duplicate detection on the opportunity table.

Does this statement meet the goal? Select True if yes, otherwise select False.

A. True
B. False

B. False

This statement does not meet the goal. Duplicate detection is not linked to the triggering of flows. It is used to detect duplicates in a table based on duplicate detection rules.

Question 6:

You are a Power Platform functional consultant.

You are using Power Automate Desktop and want to automate a few manual processes.

Which two of the following browsers are the pre-requisite of Power Automate Desktop?

    A. Internet Explorer 11
    B. Microsoft Edge
    C. Firefox
    D. Opera
    E. Google Chrome

Answer Area

B. Microsoft Edge
E. Google Chrome

Explanation

A pre-requisite for the Power Automate Desktop is either the latest version of Google Chrome or Microsoft Edge's latest version.

Learn more here.

Question 7:

You are a Power Platform functional consultant.

You are using Power Automate Desktop Flow to automate web-based applications.

Solution: You must use Selenium IDE for this automation.

Does the solution meet the goal? Select True if yes, otherwise select False.

A. True
B. False

A. True

The solution will meet the requirements. Selenium IDE is used for automating web applications

Learn more here.

Question 8:

You are a Power Platform functional consultant.

You are using Power Automate Desktop Flow in the unattended mode for batch processing of jobs from a windows on-premise application to the cloud.

Which one of the following components should you use?

A. Internet Explorer 11
B. On-premises data gateway
C. Firefox
D. Selenium IDE
E. All of the above

B. On-premises data gateway

To run a Power Automate Desktop flow in unattended mode, you need to install the on-premises data gateway.

Learn more here.

Question 9:

You are a Power Platform functional consultant.

You educate some new consultants on Power Automate and how it works with Microsoft Dataverse (Common Data Service).

Requirement: Automatically run a Power Automate cloud flow when a row is created in Dataverse.

Which one of the following connectors should you use?

A. Common Data Service
B. Common Data Service (current environment)
C. Dynamics 365 Customer Engagement
D. Power Apps

B. Common Data Service (current environment)

This requirement uses Common Data Service (current environment) for connecting to Dataverse. [Learn more here.](#)

Question 10:

You are a Power Platform functional consultant.

You educate some new consultants on Power Automate and how it works with Microsoft Dataverse (Common Data Service).

Requirement: Manually run a Power Automate cloud flow from within a model-driven app form.

Which one of the following connectors should you use?

A. Common Data Service
B. Common Data Service (current environment)
C. Dynamics 365 Customer Engagement
D. Power Apps

A. Common Data Service

For a Model-Driven app, you can use the "When a row is selected" trigger from the "Common Data Service" connector. [Learn more here.](#)

Question 11:

You are a Power Platform functional consultant.

You educate some new consultants on Power Automate and how it works with Microsoft Dataverse (Common Data Service).

Requirement: Manually run a Power Automate cloud flow from within a canvas app.

Which one of the following connectors should you use?

A. Common Data Service
B. Common Data Service (current environment)
C. Dynamics 365 Customer Engagement
D. Power Apps

D. Power Apps

To run a Power Automate cloud flow from within a canvas app, you must use the Power Apps connector. [Learn more here.](#)

Question 12:

You are a Power Platform functional consultant.

You are educating some new consultants on Power Automate and how to build them using different components like logic, expressions, and branching.

Requirement: You need to process all the rows in a list record.

Which one of the following actions should you use?

A. Do until
B. Scope
C. Switch
D. Apply to each

D. Apply to each

The Apply to each action is a for-each style loop that iterated through each row in the dataset passed into it. [Learn more here.](#)

Question 13:

You are a Power Platform functional consultant.

You are educating some new consultants on Power Automate and how to build them using different components like logic, expressions, and branching.

Requirement: You need to concatenate phone numbers into a comma-separated list.

Which one of the following actions should you use?

A. Set
B. Compose
C. Join
D. Select

B. Compose

The Compose action creates a single output from multiple inputs. [Learn more here.](#)

Question 14:

You are a Power Platform functional consultant.

You are educating some new consultants on how to share Power Automate button flow (instant flow) with other users.

Statement: When the creator of the button flow (instant flow) share the button with other users, all the users can see the flow run history.

Is the statement correct? If yes, select True otherwise, select False.

A. True
B. False

B. False

Only the creator of the button flow can see the flow run history. All run history, including the runs initiated by a person with whom a button is shared, appears only on the Activity tab of the button creator's Power Automate mobile app. Learn more here.

Question 15:

You are a Power Platform functional consultant.

An organization is using excel sheets to capture customer requests. All the users in the organization are using it. You need to create a process to replace the excel sheets.

The organization doesn't have Dynamics 365 model-driven apps license.

Which four actions should you perform?

A. Create a custom table.
B. Create a new business process flow.
C. Choose entity as the custom table.
D. Choose entity as None (Immersive Business Process)
E. Add fields as steps.
F. Add fields and forms to the table.

B. Create a new business process flow.
D. Choose entity as None (Immersive Business Process)
F. Add fields and forms to the table.
E. Add fields as steps.

You should perform the following steps in order:

- Create a new business process flow.

- Choose entity as None (Immersive Business Process).
- Add fields and forms to the table.
- Add fields as steps.

As the organization doesn't have Dynamics 365 model-driven app, you need to use an immersive business process.

Learn more here.

Question 16:

You are a Power Platform functional consultant.

You need to monitor Power Automate cloud flows created for automation of a few business processes.

What should you do as per requirements?

Requirement	Action
View failed runs	Test Run History Resubmit
Run a flow again	Resume Save & Run Resubmit
Run a flow in editor	Test Resubmit Save & Run
Publish a flow	Save & Run Resubmit Submit

Requirement	Action
View failed runs	Run History
Run a flow again	Resubmit
Run a flow in editor	Test
Publish a flow	Submit

You should select Run history to see the list of cloud flow runs.

You should select Resubmit to run a cloud flow again.

You should select Test to run a cloud flow in the editor.

You should select Submit to publish your flow to the template gallery.
