There are a number of files in the download.
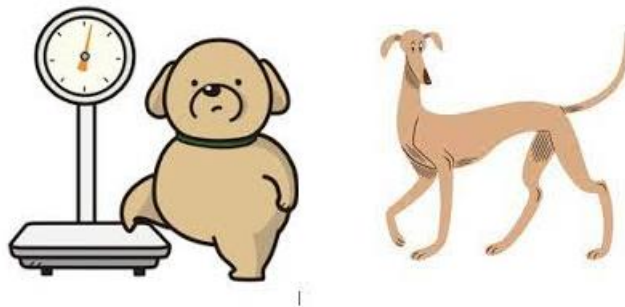

Many are for deeper understanding of TOGAF and you can refer to them later, that too only if needed.

But **do go through** <mark>**About.pdf**</mark> **file** **RIGHT NOW**.

You will then get to know the files to refer for Certification and the Parts in the files that are only needed first.

The same will be explained again and again during the Course.

Course material downloaded is very vast.

But what you need to refer for Certification and what is available for practice exercises is not that big.
